AI, ML

EDUCATION

MCS Computer Science

National University Of Modern Languages (NUML)

Islamabad

2021 | Islamabad, Pakistan

PROJECTS

SMART IOT WATER TANK (FYP)

- This Project involves an IOT based mobile app developed in Java (Kotlin) with Arduino and NodeMCU for controlling and monitoring a water tank.
- Check Status of Water Tank in our mobile through app.
- On off Motor, if user want to fill tank and on motor and off motor by the use of app.

Performance of Veterinary System (PVS) Pathway [🔗](#)

- The PVS Pathway is designed to empower national Veterinary Services by providing a comprehensive assessment of their strengths, weakness, and opportunities for improvements and this project is owned by WOA.H.
- Developed a comprehensive user management module, handling authentication, role-based access and permissions.
- Designed and customized a dynamic library module for structured data storage and retrieval.
- Built both backend and frontend components, ensuring seamless integration.
- In this project, we are using React.js, Node.js, Express.js, MSSQL, RTK Query, Redux, Bootstrap, MUI, CKEditor.

SONT (Standard Online Navigation Tool) [🔗](#)

- This project is also owned by WOA.H. In this project we have developed an online tool in which animal disease content is available at online platform in which user can search, upload, format document, switch languages in English, French and Spanish and download in pdf form.
- In this project, we are using React.js, Node.js, Express.js, MSSQL, Bootstrap, MUI, Redux and CKEditor.

Commuters Link [🔗](#)

- This website is designed for share commute with passengers during the travelling and make a partner on daily basis or weekly basis.
- In this website I have worked as a Frontend Developer in React.js with bootstrap, material UI with using Context API and Redux.

DRAP (Drug Regulatory Authority Pakistan)

- I worked on the Drug Regulatory Authority Pakistan, Managing the license workflow and Develop a Track & Trace Module.
- In the project we have all data of pharmacy in Pakistan on the region base and have record through track and trace system of medicine for pharmaceutical company to pharmacy.
- In this project, we have worked as a Fronted Developer in React.js with bootstrap, material UI with using Context API, RTK Query and Redux.
